

# FUTURE MOBILE WORK MACHINE

Future Mobile Work Machine is an insightful forerunner event focusing on the future of the non-road mobile machine industry, and an excellent opportunity to meet world leaders in their field.

The event is intended especially for executives, directors, managers, and experts of machine manufacturers, technology companies and other collaborators, and for professors and researchers of the relevant research areas.

## CONCEPT

**Oct 7 2025** Showcase excursion with Tech EXPO  
Dinner & networking

**Oct 8 2025** Seminar program & Networking

**Oct 7-8, 2025 Tampere, Finland**

## This years topic: Data as a Driver of New Value

- Harnessing the power of data to create new value for end users and the value chain
- Exploring how artificial intelligence, fueled by data, enables smarter machines, higher autonomy levels, and new services
- Highlighting the role of connectivity, edge computing, and cyber resilience in unlocking the full potential of data-driven value creation

Instead of traditional 2-day-event of seminar program, this year we offer the guests one day of traveling around the most interesting showcase sites around Tampere area, while the second day is more traditional seminar day with top expert keynote speakers carefully selected for the occasion.
