Inside information, positive profit warning: S-Bank raises its outlook for 2024

S-Bank Plc is raising its outlook for 2024. The company now estimates that its full-year operating profit will exceed the previous year's level (EUR 147.4 million in 2023). Previously, the company expected its full-year operating profit to be almost at the same level as in the previous year.

The raised outlook is based on S-Bank's strong financial performance throughout the year. S-Bank's financial performance is also supported by the successful transaction with Handelsbanken. The transaction was successfully completed at the turn of November and December and is expected to have a more positive impact on the result than previously estimated.

S-Bank will further comment on its financial performance in connection with the publication of its financial statement bulletin on 6 February 2025.
