

## Reka Industrial Plc: Reka Cables enters the fast-growing electric car charging market in Denmark

28.1.2022 15:45:00 EET | Reka Industrial Oyj | Inside information

Reka Industrial Plc's subsidiary Reka Cables Ltd has received a strategically significant, renewable energy related cable order from Denmark for the construction of charging infrastructure for electric cars. The value of the order is approximately EUR 0.6 million and deliveries are scheduled for the first half of this year. In addition, the agreement includes an option to double the order quantity this year.

The Danish government aims to have 775,000 electric and hybrid cars on Danish roads by 2030. At the end of 2021, there were about 66,600 registered electric cars in Denmark, which is only a fraction of the country's total car fleet of about 2.79 million.
