CEO Tuomo Vähäpassi:

"Lifeline SPAC I has continued to operate systematically and proceeded with the analysis of high-growth potential technology companies in different stages of maturity in Finland and other Nordic countries.

Even though we have also assessed new potentials, our main focus under the reporting period and thereafter has turned into a more profound analysis of and dialogue with such already identified companies that we deem most interesting for our shareholders.

One of the material equity market themes since our IPO has been the strong decline in market capitalisations and valuation levels of listed companies in the technology sector. We also have been closely monitoring this development. Although there are still uncertainties in the capital markets and different views of the outlook, the decline in market capitalisations and valuation levels in the technology sector showed signs of stabilisation towards the end of the reporting period and thereafter. For instance, compared to the market values that prevailed at the end of June 2022, BVP Nasdaq Emerging Cloud Index declined only some 2 % by the end of February 2023, whereas the Goldman Sachs Non-Profitable Technology Company Index declined some 4 % over the same period.

From Lifeline SPAC I's perspective, a potential negative factor in the strong decline in valuation levels has been the slowness in discussions with some target companies. Should the valuation environment in the technology sector stabilise, we expect that it may impact Lifeline SPAC I's activities positively.

Lifeline SPAC I is a company whose activities are limited in time. To take the right decisions at the right time for the benefit of our shareholders has been and is at the core of our operational thinking. The importance of this is naturally even more emphasised during the next quarters."

Future Outlook

Lifeline SPAC I is in the search phase, in which it identifies and analyses possible target companies with the aim to complete the Acquisition of a high growth potential Nordic technology company within 24-36 months of the IPO. Taken the nature of

the Company's activities as a SPAC in a search phase, the Company does not issue any specific guidance or other future outlook.

Lifeline SPAC I in brief

Lifeline SPAC I Plc is a Finnish Special Purpose Acquisition Company founded for corporate acquisitions. We raised capital with an offering and listed on the SPAC segment of the regulated market of Nasdaq Helsinki. Our objective is to carry out an acquisition within 24-36 months from the listing. We offer investors an opportunity to invest in companies that retail investors or many institutional investors otherwise would not be able to invest in, because these kinds of investments are typically made by later-stage private equity funds. Our aim is to generate profit for shareholders and increase the value of the target company by supporting its growth and development also after the acquisition. Our primary strategic goal is to identify and merge with an unlisted technology-focused Nordic company with high growth potential.
