Pohjolan Voima Oyj's Financial Statements Release 2023

Pohjolan Voima's electricity production increased in 2023 and the total electricity supply amounted to 17.6 (12.9) TWh. Electricity supply increased as Teollisuuden Voima Oyj's Olkiluoto 3 power plant unit continued the test production and started the commercial production. This affected also the increase in turnover and in materials and services. Heat supply amounted to 2.8 (3.1) TWh.

99% (97) of the electricity and 90% (80) of the heat produced by Pohjolan Voima was carbon neutral.
