GRK Infra Plc Investor News 16 November 2026 at 2:00 p.m.

GRK has signed a new agreement for SSAB’s MiniMill project in Luleå, Sweden. The new agreement strengthens GRK’s role in the project and expands the company’s scope from piling works to concrete and earthworks. The preliminary value of the agreement is approximately SEK 280 million, or approximately EUR 25 million. The agreement was signed on 10 November 2026 and recorded in GRK’s order backlog in the fourth quarter of 2026.

The contract concerns the preparatory phase of the project and includes concrete structures and groundwork. Construction will begin in November and is expected to take approximately five months. The project will be carried out in close cross-border collaboration, leveraging the expertise and resources of the entire GRK Group. In addition to the Swedish organisation, the project will draw on GRK’s specialised expertise in Finland as well as KSBR’s strong expertise and resources.

GRK is currently carrying out an extensive piling contract at SSAB’s site. With the new agreement, GRK’s role in the MiniMill project is strengthened and expands into new phases of work. The project supports the company’s growth in demanding industrial construction and demonstrates GRK’s ability to deliver solutions for industrial and green transition projects.

“This is a good example of how the expertise and resources of the entire GRK Group can be utilised across national borders. In this project, we are combining our Swedish organisation’s local knowledge with specialised expertise from Finland, including KSBR’s strong expertise. Through this collaboration, we are able to offer the customer an even broader range of services,” says Mika Mäenpää, CEO of GRK.
