Scanfil plc Stock Exchange Release 28 November 2022 at 12:00 p.m. EET

Scanfil plc's CEO Petteri Jokitalo plans to leave the company by the end of 2023

Scanfil's CEO, Petteri Jokitalo, has informed Scanfil plc's Nomination and Compensation Committee about his plan to leave the company by the end of 2023. Petteri Jokitalo has worked as a CEO since 1 April 2013.

"Next year, I will have been working as Scanfil's CEO for ten years, and at Scanfil for 15 years in total. It has been a great journey, and I know that I will especially miss the people I have worked with. However, ten years in the position of CEO is a relatively long time, and I have decided to start planning the next phase of my professional life", says Petteri Jokitalo, the outgoing CEO.

"On behalf of the board, I want to thank Petteri for his strong contribution to the company in Scanfil's management. The company has grown to a larger category in size, and the know-how has developed, enabling strong competitiveness. Petteri has built a motivated organization, ensuring a good starting point for the company to succeed in the future as well. His commitment to lead the company until the end of 2023 gives enough time to search for a successor", says Harri Takanen, Chair of the Board of Directors.

Scanfil in brief

Scanfil is an international manufacturing partner and system supplier for the electronics industry with over 45 years of experience in demanding manufacturing. Scanfil provides its customers with an extensive array of services, ranging from product design to product manufacturing, material procurement and logistics solutions. Vertically integrated production and a comprehensive supply chain are the foundation of Scanfil's competitive advantages: speed, flexibility and reliability.

Typical Scanfil products are modules or integrated products for e.g. self-service application, automation systems, wireless connectivity modules, climate control systems, collection and sorting systems, analyzers and weather solutions. Scanfil services are used by numerous international automation, safety, energy, cleantech and health service providers, as well as companies operating in the field of urbanization. Scanfil's network of factories consists of 9 production units in Europe, Asia and North America. Read more: www.scanfil.com
