Scanfil plc Insider information 11 February 2023 at 2:00 p.m. EET

Scanfil has signed a CEO agreement with Christophe Sut

Today, Scanfil has signed an agreement with Christophe Sut, who will start as the new CEO of Scanfil at the latest on the 1st of September 2023. Until he assumes his new role, the current CEO Petteri Jokitalo will continue as the CEO. After that, Petteri Jokitalo will act as an advisor to the Board of Directors by the end of 2023.

Christophe Sut is currently the President of the Manufacturing Solutions at Sandvik Group. He has an extensive experience in business development, sales and marketing in B2B environment, with over 12 years in leading positions.

"I am honored to be appointed as the new CEO of Scanfil. It is one of the top players in the European EMS industry," says Christophe Sut. "The company is financially strong and fast growing. It is a highly appreciated business partner among its customers and suppliers, and a respected employer among its employees. We have all the elements to build future success."

"On behalf of the Board, I would like to welcome Christophe to the company," says Harri Takanen, Chair of the Board of Directors. "We are delighted to get him on board and lead Scanfil to the next phase of international growth and margin improvement."

In the attachment, you can find Christophe Sut's resume and image.

Scanfil in brief

Scanfil is an international manufacturing partner and system supplier for the electronics industry with over 45 years of experience in demanding manufacturing. Scanfil provides its customers with an extensive array of services, ranging from product design to product manufacturing, material procurement and logistics solutions. Vertically integrated production and a comprehensive supply chain are the foundation of Scanfil's competitive advantages: speed, flexibility and reliability.

Typical Scanfil products are modules or integrated products for e.g. self-service application, automation systems, wireless connectivity modules, climate control systems, collection and sorting systems, analyzers and weather solutions. Scanfil services are used by numerous international automation, safety, energy, cleantech and health service providers, as well as companies operating in the field of urbanization. Scanfil's network of factories consists of 9 production units in Europe, Asia and North America. Read more: www.scanfil.com
