The profit guidance for 2015 was amended with a stock exchange release on 18 March 2015.

Juha Vanhainen, CEO:

"There was a slight increase in our net sales during the first quarter. Net sales in the Food Business were at the previous year's level and satisfactory considering the challenging market situation in the food sector. Net sales in the Grains and Oilseeds Business grew on the previous year on account of active grain trading.

In March, we lowered our expectations regarding our full-year financial performance based on the weakened economic outlook for the sugar market and domestic food sector in the near future. The first-quarter operating profit excluding non-recurring items decreased as expected from the previous year. Profitability in the fish and fresh products groups of the Food Business in Finland was unsatisfactory, and the low price level in the sugar market substantially weakened the result of the associated company Sucros from the previous year.

In January, we launched an investment project to develop a grain terminal at the port of Inkoo. This investment will strengthen our position as a partner to Finnish farmers and significantly increase our grain export capacity starting this crop year.

The long-term profitability programmes under way in the Food Business's fish and fresh products groups progressed as planned. The programme measures are being implemented in stages during 2015, and the aim is to achieve a total reduction of EUR 4.5 million in annual costs going forward. In the first quarter of the year, we implemented changes in the production structure by centralising

operations in fish products in the Kuopio and Helsinki. In the first quarter, the impact of these programmes on the cost level of the Food Business was EUR -0.4 million year-on-year.

This year our main target in the Food Business is to achieve the goals of our long-term profitability programmes and to stabilise the profitability development of the business on a positive track."

PERSONNEL

The Apetit Group employed an average of 695 (746) people in the first quarter.

SEASONALITY OF OPERATIONS

In accordance with the IAS 2 standard, the historical cost of inventories includes a systematically allocated portion of the fixed production overheads. With production focusing on harvest time, raw materials are processed into finished products mainly during the final quarter of the year, which means that the inventory volumes and balance-sheet values are at their highest at the end of the year. Since the entry of the fixed production overheads included in the historical cost as an expense item is deferred until the time of sale, most of the Group's annual profit is accrued in the final quarter. The seasonal nature of operations is most marked in frozen foods and the operations of the associated company Sucros, where production reflects the crop harvesting season.

In Finland, sales of fish products peak at weekends and in connection with public holidays. In the fish products group in Finland, a significant proportion of the full-year result depends on a successful Christmas season. Due to the growing season for fish, the profit accumulated by the Taimen Group, which is reported as an associated company, is normally smaller during the summer than at other times of the year. Net sales in the Grains and Oilseeds Business vary from one year and quarter to the next, even quite considerably, being dependent on the demand and supply situation and on the price level in Finland and other markets.

OVERVIEW OF OPERATING SEGMENTS

Food Business

EUR million	Q1/2015	Q1/2014	Change	2014
Net sales	41.5	41.6	0%	170.8
Operating profit excluding non-recurring items	-2.4	-1.5		0.6
Operating profit	-2.4	-1.5		-9.7

First quarter (January-March)

First-quarter net sales in the Food Business were at the previous year's level and amounted to EUR 41.5 (41.6) million. Sales in the fish products group were up in all countries of operation (Finland, Norway and Sweden). Sales of fresh products decreased in the staff restaurant and professional food service sector due to an overall reduction in delivery volumes. First-quarter sales of the frozen foods group to retailers and the professional food service sector was at the previous year's level.

Discussion on the price and domestic content of food as well as price campaigning in stores were active in the first quarter. Consumers still appreciate Finnish foods, but price has also become more important in purchasing decisions. Sales of the Apetit Kotimainen domestic product range to retailers and professional food service sector customers grew in the frozen foods group by 4 per cent on the same period the previous year. Early this year, the Apetit Kotimainen domestic frozen products range

range was complemented with two new products, Apetit Kotimainen champignon soup and Apetit Kotimainen lactose-free cream potatoes.

The operating profit excluding non-recurring items was lower than a year earlier and came to EUR -2.4 (-1.5) million. Significant costs due to marketing and packaging redesign took place in the first quarter as part of the long-term development of the Apetit brand and packaging. The first-quarter profit impact of the associated company Taimen Oy was EUR -0.3 (-0.1) million. In Finland, the profitability of the fish products group and the fresh products group was unsatisfactory. The profitability of the fish products group improved in Norway, while in Sweden profitability was still adversely affected by the steep and continued increase in shellfish procurement costs and poor availability of raw materials. Necessary price rises were introduced during the period. As a result of the steep increase in prices and availability problems, the delivery volumes of shellfish products decreased from the comparison period. The profitability of the frozen foods group was at a good level.

Changes in the fair value of currency hedges had an impact of EUR -0.2 (0.0) million on the operating profit. The Food Business employed an average of 601 (655) people. The personnel figure was reduced by the crop year production taking place in 2014 and the functional and structural changes implemented in the fish products group.

Investment in the Food Business totalled EUR 1.3 (0.2) million and was mainly targeted at increasing automation in production, new production equipment and the development of enterprise resource planning systems.

Long-term profitability programmes in Food Business

The implementation of the long-term profitability programmes continued in the first quarter as planned. During the period, changes were mainly made in order to simplify the network of operating units. In the fish products group, the operations in Kustavi and Turku were discontinued and production moved to Kuopio and Helsinki. In the fresh products group, the Jyväskylä facility had already been closed down in June 2014. In the first quarter, the impact of the profitability programmes on the cost level of the Food Business was EUR -0.4 million year-on-year.

The programme measures are being implemented in stages during 2015, and the aim is to achieve a total reduction of EUR 4.5 million in annual costs going forward in the fish products group and fresh products group in Finland. In addition, the measures are expected to substantially increase the product groups' market competitiveness.

The long-term profitability programme measures for the fish products group include changes concerning product range optimisation, production structure re-evaluation and a clearer division of responsibilities for production units in different locations. The measures launched in the fresh products group focus on optimising the product range and raw material procurement, raising operating efficiency to a new level and developing distribution logistics.

Grains and Oilseeds Business

EUR million	Q1/2015	Q1/2014	Change	2014
Net sales	50.0	47.4	+6%	214.2
Operating profit excluding non-recurring items	1.6	2.3		7.8
Operating profit	1.6	2.3		7.8

First quarter (January-March)

First-quarter net sales in the Grains and Oilseeds Business were up from a year earlier and totalled EUR 50.0 (47.4) million. Net sales and delivery tonnage increased on the previous year in both the grain trade and oilseed products. There was also an increase in the sales of both unpackaged and packaged vegetable oil products.

The first-quarter operating profit excluding non-recurring items was EUR 1.6 (2.3) million. Operating profit excluding non-recurring items in the comparison period included a rebate on energy taxes and a supplementary pension cover refund, totalling EUR 0.4 million. In the grain trade, profitability improved on the previous year as a result of increased volumes. The profitability of oilseed products was lower than the excellent level achieved in the same period a year earlier.

An average of 83 (80) people were employed in the Grains and Oilseeds Business.

Investment in the financial year came to EUR 0.6 (0.1) and was mainly targeted at the construction of grain stock capacity and development of infrastructure at the Inkoo port. The investment project will improve the efficiency and increase the volume of Finnish grain exports from the southern parts of the country to international grain markets and also give a major boost to the export volumes of the Grains and Oilseeds Business. At the initial stage the targeted annual volume at the Inkoo port is approximately 50,000 tonnes of grain, of which about 80 per cent will be new export volume. Apetit issued a stock exchange release on the launch of the investment project on 13 January 2015.

According to Coceral, the European association representing the trade in cereals, rice, feedstuffs, oilseeds, olive oil, oils and fats and agrosupply, grain production in the EU is expected to decrease by 6.5 per cent to 302.5 million tonnes. However, the ending stocks with an estimated volume of 40 million tonnes, would increase the volume of grain in the market almost to the level of the ending crop year.

Other Operations

First-quarter operating profit excluding non-recurring items was lower than a year earlier and came to EUR -1.4 (-1.0) million. The share of the profit of the associated company Sucros was EUR -0.7 (-0.2) million. The result for the associated company Sucros was adversely affected by the extremely difficult market situation and a steep decline in the market price of sugar in comparison with the first quarter a year earlier. Non-recurring items totalled EUR 0.0 (-0.4) million.

A total of 10 (10) people were employed in the Other Operations segment.

Investment in non-current assets in Other Operations totalled EUR 0.0 (0.0) million.

SHORT-TERM RISKS AND UNCERTAINTIES

The most significant short-term risks for the Apetit Group are related to the management of raw-material price changes and currency risks, the availability of raw materials, the solvency of customers, the delivery performance of suppliers and service providers, changes in the Group's business sectors and customer relationships, and the success of the profitability programmes in the Food Business.

PROFIT GUIDANCE FOR 2015

The Group's full-year operating profit excluding non-recurring items is expected to fall short of the previous year's level.

Owing to the extremely challenging situation in the sugar market, the associated company Sucros, which is part of the Other Operations segment, is anticipated to make a loss this year.

In Finland, the market situation in the food sector is expected to remain challenging. The aim of the long-term profitability programmes in the Food Business is to improve profitability and competitiveness. The impact of these programmes on the operating profit is expected to be felt in stages during the year as the measures are implemented.

In the Grains and Oilseeds Business, no major change is expected in the prospects for profitability in 2015 compared with the previous year.

Due to the substantial effect of international grain market price fluctuations on the entire Group's net sales, Apetit will not issue any estimates of the expected full-year net sales.

Interim reports for 2015 will be published as follows: January-June on 12 August 2015 at 8.30 am, and January-September on 30 October 2015 at 8.30 am.

OTHER COMMITMENTS

Based on the shareholder agreements on the ownership arrangement between Apetit Kala Oy and Taimen Oy, once certain terms and conditions are met the contracting parties are entitled to terminate the cross ownership at fair value. The liability in any termination of ownership EUR 2.7 (2.6) million is, on the basis of IAS 32, recognised under non-current liabilities. The receivable arising in connection with this may not, under IFRS rules, be recognised.

MATERIAL EVENTS SUBSEQUENT TO THE END OF THE REVIEW PERIOD

Apetit Plc announced in a stock exchange release published on 9 April 2015 that it would buy back Taimen Oy's holding in Apetit Kala Oy. The parties agreed to rescind the corporate transaction completed between Apetit Kala Oy and Taimen Oy in 2010 and the cross-shareholding specified within it. The deal will be carried out in the form of a change in holdings, without any cash compensation. Under the agreement, Taimen's 30 per cent holding in Apetit Kala will be terminated and Apetit Kala's 30 per cent holding in Taimen will be reduced to about 23.7 per cent. On 29 April 2015, Apetit issued a stock exchange release on Finnish Competition and Consumer Authority (FCCA) approval of the transaction. The ownership arrangement is planned for implementation during spring 2015.
