Panostaja's portfolio company CoreHW signs a significant design services agreement worth approximately EUR 17 million

Panostaja Oyj's portfolio company CoreHW has signed a significant design services agreement with an international technology company. The agreement is worth approximately EUR 17 million and the work will be carried out mainly during 2027–2028. It has been agreed with the customer that the identity of the customer, the detailed scope of the design services and the IP package related to the project will remain confidential.

The project will commence in the final quarter of the 2026 financial year. Of the total order value, less than EUR 1 million is estimated to be attributable to the 2026 financial year. The project is expected to be completed during 2029.

"This agreement is a major milestone for CoreHW and a strong endorsement of our RF IC expertise. By combining specialist expertise that is rare worldwide with our proprietary IP and IC delivery capabilities, we enable our customers to achieve ambitious technology goals. We have worked systematically to build these capabilities, and the customer's trust is recognition of our team's expertise and commitment," says Tomi-Pekka Takalo, CEO of CoreHW.

"The project is an excellent demonstration of CoreHW's internationally recognized expertise in semiconductor design. We see the new agreement as an important milestone in CoreHW's development," comments Tapio Tommila, CEO of Panostaja.
